Polio Communication Profile

Indicator List
(At Block Level)

Demographics

Indicator	Definition
Population size	The count of persons in a particular administrative jurisdiction at the reference time.
Under-five population	The count of children aged less than 5 years in a particular administrative jurisdiction at the reference time.
Households with access to toilet facility (%)	Percentage of households with access to toilet facility.
Literacy rate (7+ yr)	Percentage of literates to the total population in the age group 7 years and above.
Children exclusively breastfed (%)	Infants under age four months to six months who receive only breast milk.
Children with diarrhoea who received ORS (%)	Children with diarrhoea in the two weeks preceding the survey who were treated with oral rehydration salt (ORS).
Children (12-23 months) fully immunized (%)	Children in the target age group who have received all the specified dosages of vaccines as per the immunization schedule.

Polio Cases

Indicator	Definition
Polio Cases by Type, Gender, Religion and Age	Number of laboratory-confirmed wildpolio virus cases in the block, disaggregated by Type (P1, P3), Gender (Male, Female), Religion (Hindu, Muslim), and Age (less than 2 years of age).
Date of onset of most recent polio case (P1 and P3 Cases)	Date of last laboratory-confirmed case of wildpolio virus in the block.

SMNet Staff

Indicator	Definition
Number of DMCs	Number of SMNet District Mobilization Coordinators.
Number of DUCs	Number of SMNet District Underserved Coordinators.
Number of BMCs	Number of SMNet Block Mobilization Coordinators.
Number of Special profile BMCs	Number of SMNet Block Mobilization Coordinators who focus on mobile and migrant communities.
Number of CMCs	Number of SMNet Community Mobilization Coordinators.

Social Mobilization for Polio

Indicator	Definition
DM led district task force meeting held (Yes/No)	Monthly coordination meetings with polio partners, to plan the polio round and discuss issues that require attention.
Planned mothers' meetings held (#)	CMC faciliatied meetings with all mothers in CMC catchment area, with a focus to attract mothers in X households.
Planned religious meetings held (#)	Local meetings held with religious themes, into which polio messages are incorporated.
Planned neighbourhood meetings held (#)	CMC facilitated meetings with mothers and fathers of Xr and X households, led by the SMNet.
X families attending any community meeting (Target 90%)	Involvement of X families in any community meeting (religious, mother, or neighborhood).
X houses reached with IPC (Target 90%)	Any X family who received a visit by CMC after the round.
Posters visible in CMC areas (Target 90%)	CMC areas with visible posters.
Posters visible(%)	All areas with visible posters.
Booth banners present in CMC areas (Target 90%)	CMC areas with visible banners.
Booth banners present (%)	All areas with visible banners.
Booth mobilization (Target 60%)	Resident families in CMC area who are mobilized to the booth.
Influencers attended interface meeting according to microplan (Target 90%)	Influencers who attended planned meetings between supervisors and influencers.
Assigned influencers accompanying vaccination team in biphasic activity (Target 85%)	Influencers accompanying vaccination team to convert X families during the round.
Rallies in CMC areas (#)	Number of rallies held before the polio round.
Bulawa tolies in CMC areas (#)	Number of peer groups (of more than 10 school-age children) mobilizing children for booth activity.
Polio classes in CMC areas (#)	School classes where polio is discussed by CMC before the round.

Underserved Strategy

Indicator	Definition
Mosques with PA facility announcing for Polio round	Mosques with PA facility announcing the date and site of the polio round at least once.
RI sessions announced by mosque in applicable areas (Target 80%)	Mosques with PA facility announcing the date and site of RI sessions when sessions are planned.
Children immunized during marriages (#)	Children immunized during identified marriages in CMC areas.
Mazars/Dargas identified (#)	Underserved shrines/festivals identified for advocacy and immunization.
Nomadic sites identified (#)	Sites where nomads can potentially settle.
Children identified from Nomadic sites/settlements (#)	Children identified from nomadic sites that have been settled by nomads.
Performance of informers	Nomadic informers who report the identification of incoming or outgoing nomads on time (weekly).
Children in high risk groups immunized	Children identified from mobile, migrant, and slum dweller communities who have been immunized.

Newborn & Routine Immunization Coverage

Indicator	Definition
Households with identified newborns (Target 1%)	Any household with a newborn identified during the month.
Identified newborns receiving birth dose (Target 90%)	Identified newborn receiving OPV within one month of birth.
Households provided with IPC on RI by CMC (Target 90%)	Household that has received personalized counseling on RI before RI session.
Planned RI sessions held (%)	Proportion of planned RI sessions held.
RI sessions facilitated by CMC (Target 95%)	Planned RI sessions where CMC is mobilizing eligible children.
Routine immunization coverage in children <1 year	Number of children under 1 year old who have received all scheduled vaccines.
RI sessions with all vaccines and equipments available (%)	RI sessions with all vaccines, syringes and cold chain equipment available.
% Mobilization	% of children mobilized for each vaccine, bearing in mind those who may have missed their scheduled vaccine.

Supplementary Immunization Activity

Indicator	Definition
Under 5 children in CMC areas (#)	Number of children <5 years of age in CMC areas in the block.
Missed Children (Target <6%)	Percent of children residing in CMC area who have not received vaccine during house to house activity.
X to P conversion in CMC areas (Target 75%)	Proportion of X households converted to P in CMC areas.
X to P conversion in Blocks (%)	Proportion of X households converted to P in entire area (CMC + non-CMC).
X to P conversion in District (%)	Proportion of X households converted to P in entire area (CMC + non-CMC).
Number of X-P converted	Number of X houses converted to P in the entire block, after biphasic activity.
Number of X remaining	Number of X houses remaining in the entire block, after biphasic vaccination activity.
Percentage of X remaining	Percentage of X houses remaining in the entire block, after biphasic vaccination activity.

* The denominator should be taken from the field book and not from the tally sheet.

Block wise indicators in CMC areas (Page 2)

Indicator	Definition
Houses (#)	Number of target households in CMC area.
Average Booth Turnout	Average number of children vaccinated at all CMC booths in a given block.
% X Generation	Proportion of X houses generated at the beginning of SIA activity.
% X Remaining	Proportion of X houses remaining at the end of the SIA activity.
% Missed Children	Percent of children residing in CMC area who have not received vaccine during house to house activity.

Type of X houses

X-R : Resistant family	X-S : Child is sick	X-H : Child out of house
X-L : House locked	X-V : Child out of village
